Key Features & FAQs

WHO IS REALITY SPORTS ONLINE FOR?

Reality Sports Online ("RSO") is designed for the avid fantasy users seeking to emulate professional front office operations and a realistic general manager experience. RSO offers the most sophisticated and realistic fantasy game in existence. However, our revolutionary software and clean interface makes negotiating contracts, signing players, managing your Salary Cap, simple and easy whether you are a dynasty expert or a re-draft player.

WHAT TYPE OF GAME DOES REALITY SPORTS ONLINE OFFER?

Reality Sports Online ("RSO") currently offers a Fantasy Football Front Office Platform (the "Football Platform"). Unlike any other fantasy game, the Football Platform blends the best elements of traditional fantasy games with the excitement of professional front office operations! RSO's Football Platform is revolutionizing fantasy sports because of its ability to meet the increasing aptitude of fantasy participants. RSO's Football Platform is most similar to a dynasty league, or franchise game format. However, unlike RSO's easy to use and manage Football Platform, other dynasty leagues, which aim to emulate real-life and sometimes include player contracts, come with an endless variety of rules and regulations, and are extremely difficult to manage thanks to their limited hosting platforms.
